Subject: Application for Class II Permissive Change for FCC ID 2AEIM-1023049

Covered accessories – mobile connector handle, supercharger handle, wall connector handle

To whom this may concern.

This is a request a Class II permissive change for FCC ID: 2AEIM-1023049 which has an original grant date of 01/05/2015.

The construction of the handle is common in all three accessories.

The change filed under this application is a firmware change such that the Tx occurs at the time when the users press the button instead of at the release of the button.

The device has the identical form, fit and function to the original device. The enclosure, RF components, and antenna are identical as originally certified device, and the output power rating remains identical. All previously submitted docs remain unchanged.

If you have any question regarding this application, please feel free to contact me.
